This letter is an introduction to you about our Business and the swimming pool heating we have installed and service.

Firstly I would like to introduce our Company to you, which is Heat Pump Systems. The Company consists of myself (Sean Hanna) and my Business partner Steve Good. Our Business is swimming pool heating, pool heating by means of **Heat Pumps, Solar, Electric element or Gas.** (Ranging from 6 KW to 250 KW) We have a Company called Hot Water Heat Pumps who manufacture our heat pumps for us and these systems are second to none. This is backed by a **thirty-year corrosive warranty** on the titanium heat exchangers and two years mechanical warranty on the rest of the system.

We are the Australian importers of "Performance Plus" Heat Pumps. We use AMR Solar Pool Heating as it is a well-known brand in Melbourne and has been operating for over twenty years. The collector is backed by a Ten-year warranty plus one year on the controller, pump and workmanship.

What our Company offers is sizing the correct heating system for the job, installing the system and once installed we offer a full after sales service plus a maintenance program to existing heat pumps as both Steve and I are fully qualified Refrigeration Engineers and have been involved in the heat pump industry for over 25 years.
